PEACHES

- CARDINAL..(Labelled 2 green stripes) Yellow fleshed, clingstone peach. Has attractive red skin with a yellowish background. A good dessert peach. Its firmness makes for excellent shipping. Good for our area. Ripens 6½ weeks before Elberta.
- REDCAP....(3 white stripes) A yellow fleshed, clingstone. Has attractive yellow skin with a pleasing red blush. A good dessert peach, generally used for areas farther south. Ripens 6 weeks before Elberta.
- DIXIRED...(1 orange 2 red stripes) Has an attractive red color on the outside. A yellow fleshed clingstone peach. A vigorous and productive tree, ripens slowly, has good market value. 6 weeks before Elberta.
- DIXIGEM...(2 red stripes) Bright red on outside. Freestone, yellow fleshed. Excellent for freezer. Ripens 5 weeks before Elberta.
- RANGER....(3 blue stripes) Yellow fleshed freestone, ripening about 4 weeks before Elberta. Superior to Golden Jubilee.
- REDGLOBE..(1 white 1 red stripe) The excellent red coloring makes it most attractive. Ripens 2 weeks before Elberta.
- HALEHAVEN..(1 green stripe) A fine yellow fleshed freestone peach. Outside color is a good red. Its firmness makes this peach good for commercial, shipping, or home use. Ripens 2 weeks before Elberta.
- JULY ELBERTA..(3 black stripes) Large yellow fleshed freestone. Outside coloring has attractive red mingled with the yellow background. The firmness of this peach makes it an excellent canner or shipper. Ripens 2 weeks before Elberta.
- REDSKIN...(3 red stripes) Yellow fleshed freestone. Has a very attractive red skin. Heavy producer, superior in quality to Elberta. Can be used in South Texas. Excellent for freezer as it does not turn brown immediately after cutting. Ripens same time as Elberta.
- ELBERTA...(1 orange stripe) Outside coloring is yellow tinged with red. Yellow fleshed, freestone. This is an old reliable well known peach. Most widely planted in the world. Good for canning, eating and commercial use. Ripens around July 26th.
- PERKINS...(1 white 1 green stripe) Truly a delicious yellow fleshed, perfect freestone. Outside coloring is a dark red blush with rich undertones of gleaming yellow. Sweet without the bitter twang of Elberta. Ripens after Elbertas are gone, when you want peaches badly.
- FRANK....(2 black stripes) A yellow cling with a red cheek, sweet enough to be canned without sugar. It is the size of Elberta with much better flavor. It is frost resistant. Ripens 10-14 days after Elberta.
- INDIAN....(2 yellow stripes) A red fleshed, clingstone peach, with a red skin. Used mostly for table use and canning. Fruits usually ripen after Elberta.
